

Appl. No. 10/715,027
Amendment dated September 6, 2006
Reply to Office action of July 14, 2006

Amendments to the Drawings:

Please find enclosed a replacement sheet for Figs. 1-3 and a new sheet for Fig. 6.

Attachment: Replacement Sheet and New Sheet

Appl. No. 10/715,027
Amendment dated September 6, 2006
Reply to Office action of July 14, 2006

REMARKS/ARGUMENTS

Entry of the foregoing amendment and reconsideration of this application are requested. This is a response to an Ex Parte Quayle office action in which all claims 1-6 have been allowed.

In response to the drawing objection, applicants submit the enclosed replacement sheet for Figs. 1-3 and a new sheet for Fig. 6.

The diaphragm seating member assembly in Fig. 1 now includes the reference number 16 as suggested by the Examiner, as well as reference numeral 15.

Fig. 6 now illustrates a segmented cross-sectional view of the spray valve of the present invention. Fig. 6 includes the piston 22 slidable in hydraulic chamber 78, the upper seat 26 for the piston 22 within the hydraulic chamber 78 of the upper valve body 12, and the vehicle's hydraulic fluid system 84 connected to hydraulic chamber 78. Additionally, seat 25 formed in piston 22 for spring 23 is now shown. It is now believed features of the present invention are clearly shown in the combination of Figs. 1-6, and that the drawings are in compliance with 37 CFR §1.83(a).

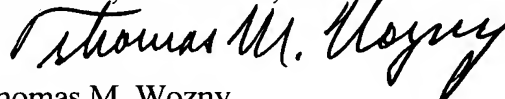

Applicants have amended the specification accordingly without adding any new subject matter.

It is now submitted that all formal matters regarding the drawing deficiencies have been remedied and that the application is in condition for allowance.

The Examiner is requested to pass this application to issuance with claims 1-6 having been deemed allowable.

Respectfully submitted,

ANDRUS, SCEALES, STARKE & SAWALL, LLP
